

## Mod. 300x180

### Oscillating-knife cutting tables with flat cutting surface sized 300 x 180 cm.

All models share these features:

- Punching speed: 220 holes per minute;
- Cutting speed: 50 metres per minute;
- Acceleration:

1

g

We propose these models:

- Flashcut 30180: partitioned smart vacuum system and digital projector.
- Flashcut 30180 UP: partitioned smart vacuum system and digital projector.
- Flashcut 30180 UCP: partitioned smart vacuum system, digital camera and projector

To choose the most suitable system several considerations must be made. The materials to be cut, how your production is organised and several other points must be taken into account in order to identify the correct machine and its optimal configuration.

For these reasons we do not overload you with technical data tables: reading oscillating-knife cutting systems introduction you can understand how powerful and versatile these machines are. To help you in the decision process you can rely on the long experience of Atom technicians and cutting experts. You have a whole team at your disposal to discuss your needs and evaluate available options.

Atom world-renowned quality makes you sure that you are going to buy an excellent machine. Atom experience ensures you that you will buy exactly the one you need.
